

Master Degree Program

Requires completion of at least forty-eight credit hours with two-study plans.

The study plan (I) is a thesis-only plan which comprises only a research work for thesis. The thesis is equivalent to no less than forty-eight credits.

The study plan (II) is a course work plus thesis plan which comprises twelve credit hours of core courses, twelve credit hours of major courses, four credit hours of elective courses, four credits hour of seminars, and sixteen credits of thesis.

Doctoral Degree Program

It has the same study plan as the Master Program does, however, a completion of at least

ninety-six credit hours is required.

The study plan (I), students conduct research for thesis that is equivalent to no less than ninety-six credits.

The study plan (II), Bachelor's degree holders are required to complete at least thirty-two credit hours of courses and sixty-four credits of thesis.

Those courses can be divided into twelve credit hours of core courses, twelve credit hours of major courses, four credit hours of elective courses, and four credit hours of seminars. Students having a Master's degree are required to complete at least fourteen credit hours of major and/or elective courses and forty-eight credit of thesis.
